

1mw outdoor telecom cabinet for field operations in norway

What is an outdoor Telecom cabinet?

Technologies such as digital transformation, Industry 4.0 and Big Data create revolutionary differences in our lives. Outdoor Telecom Cabinets are rugged enclosures designed to protect telecommunications equipment from environmental factors while providing secure access for maintenance.

What is an outdoor telecommunication enclosure?

Damage-resistant and reliable outdoor enclosures are key for outdoor telecommunication applications from cell tower sites and fiber optic networks to substations. These specialized cabinets house and protect sensitive equipment like routers, switches, and other network devices.

What is the IP55 specification for outdoor telecoms street enclosures?

We manufacture our outdoor telecoms street enclosures to IP55 specification using galvanised steel. Compliance with IP (Ingress Protection) ratings and NEMA (National Electrical Manufacturers Association) standards certifies their ability to withstand environmental conditions and protect sensitive equipment.

What size cable looms can be mounted on a vertical racking frame?

The vertical racking frame is segmented to allow mounting of 19 inch (482.6 mm) and Euro metric 21 inch (533.4 mm) equipment. We can provide a cable management system for a 50mm diameter cable loom down the full height of both sides of the cabinet. Horizontal cable management and slotted ducts with covers can be provided as required.
