

500kW Communication Power Supply Cabinet for Australian Tunnels

The Roadside Cabinets not only provide VMS power and communications interfaces to field personnel, but also for house optional battery back-up for the VMS Controller Module, external communications ...

This document specifies the requirements for the manufacture, supply and general installation requirements of distribution cabinets to be used for providing power to VicRoads electrical ...

B& R's range of approved and certified roadside ITS cabinets can be configured to include low voltage (LV) and extra low voltage (ELV) sections to support specific project requirements.

Starting from the main distribution, the TAP box supplies power to your individual tunnel applications, such as the lighting and evacuation systems. This protects the main distribution from short circuits.

This system (uninterruptible power supply (UPS), diesel generator., etc.) supplies electricity to equipment critical for safety, during a limited period of time.
