

Accelerate the layout of energy storage projects

Recently, PJM began changing its Surplus Interconnection Service (SIS) rules, which would accelerate the deployment of energy storage to support and enhance sites with existing ...

Global energy storage additions are on track to set another record in 2025 with the two largest markets - China and US - overcoming adverse policy shifts and tariff turmoil.

If the system demand for storage is not met, policymakers in the declining cluster would need to establish a supportive policy framework as soon as possible to enhance the financial ...

The GSL is an energy storage research and testing facility that will accelerate development of next-generation grid energy storage technologies that are safer, more cost effective, ...

Cross-Border Partnerships Drive Rapid Expansion of Utility-Scale Solar and Storage Projects By Girish | February 5, 2026 Cross-border partnerships are emerging as a powerful catalyst ...

This EPRI Battery Energy Storage Roadmap charts a path for advancing deployment of safe, reliable, affordable, and clean battery energy storage systems (BESS) that also cultivate equity, ...

At COP28 in Dubai, United Arab Emirates, the CEM announced the Supercharging Battery Storage Initiative as a vehicle to accelerate battery storage deployment around the world, recognizing its ...

Breakthroughs in battery technology are transforming the global energy landscape, fueling the transition to clean energy and reshaping industries from transportation to utilities.

In January 2020, DOE launched the Energy Storage Grand Challenge (ESGC) to facilitate a department-wide strategy to accelerate the development, commercialization, and use of ...

We identified 5 priority reforms in the following target markets: MISO, NYISO, and PJM. Among an array of reforms considered, these unlock the largest value at scale while exhibiting a feasible policy and ...

Accelerate the layout of energy storage projects
