# B1705bcm lost communication with the base station

I was driving 60mph and my cluster said I was currently in P. Out of fear that I was about to have a major failure, I pulled over into a gas station parking lot.

What does the status light on the base stations mean? What should I do if any of the base stations is not detected? Can I use the older version of the base stations together with SteamVR Base Station 2.0? ...

The various components (Digital Radio, Receiver, Driver Door Moduel, IPC) are reporting U1024 and U1017 error codes with a Lost Communication with [BCM, TCM, ECM].

How to fix BCM body control module code U0140, U0141, U0142, U0143, U0144 and U0145 code for a, b, c, d and e lost communication with BCM...more. Audio tracks for some languages were...

I"ve resolved most of them by doing a fresh install of Windows 10 and getting everything fully updated. I only have one problem now: the integrated BCM20703 controller chip stops working ...

You may get some messages for things not working when starting Steam VR because it takes a few moments for the base stations to either shutdown or start back up.

Communication drops and breaks in the Signal Strength line show intermittent communication breaks are occurring. An additional repeater added to the system will assist in resolving these issues.

The SteamVR app communicates wirelessly with base stations through Bluetooth. The original, wired link box is required for updating firmware or configuring settings for base stations.

A Vive base station not connecting can be a frustrating experience, but it"s not the end of the world. By understanding the causes of connection issues and following the troubleshooting steps ...

Basestation firmware updates are purported to fix that issue. Automatic firmware updates aren"t going through, and I am going on ten minutes of waiting on the manual update. What am I doing wrong ...
