

China's first solar power island

China's first floating solar power project operating entirely in a seawater environment has officially been completed and put into use in Qingdao City, east China's Shandong Province, ...

In a statement released on Wednesday (13 November), CHN Energy said it had successfully connected the project to the grid, claiming it is the "first and largest of its kind in the ...

China's CHN Energy has connected the first solar units from its 1-gigawatt (GW) offshore solar farm - the world's first and largest of its kind - to the grid. The massive project is located off the...

Far off the coast of Shandong, a new kind of power plant is quietly feeding China's coastal cities. A vast field of solar panels, fixed to steel trusses in shallow water, has become the world ...

Shanghai has approved the Fengxian 1# offshore photovoltaic project, the first commercial-scale solar-wind hybrid of its kind in China. The move marks a major step forward in the ...

China has unveiled the world's first dual-tower solar thermal power station in the Gobi Desert, using 27,000 mirrors to generate renewable energy round the clock, a landmark in clean ...

China has deployed what's claimed to be the world's first integrated floating wind, solar and fish farming system. Chinese developer Longyuan and turbine-maker Shanghai Electric launched the debut ...

A massive open-sea solar plant is under construction in China, designed to power millions of homes and test how floating solar works at scale.

This project marks a significant step forward, serving as a model for the global expansion of offshore solar energy. The project is located in Dongying, East China's Shandong Province.

China is set to have more solar power capacity than coal for the first time this year, marking a "historic" milestone in the country's energy transition. Data released on Monday by a ...
