

Classification of distributed energy storage in Switzerland

This article specifically covers indirect storage technologies (ie, storage by way of transformation in other forms of energy) given their demonstrated performance, but the technologies ...

Our recent publication introduces a new open dataset that addresses this gap, where future distributed energy resources (DERs) are expected to be deployed at over two million ...

This research project addresses this gap by developing a comprehensive, high-resolution database of distributed energy resources and non-controllable loads allocated in synthetic medium- and low ...

Comprehensive review of distributed energy systems (DES) in terms of classifications, technologies, applications, and policies. Discussion on the DES policy landscape for the developed, ...

Types of Distribution System Operators in Switzerland on system operators (DSOs), which vary in structure and ownership. The landscape of DSOs is predominantly characterized by municipal util

Distributed energy systems: A review of classification, Comprehensive review of distributed energy systems (DES) in terms of classifications, technologies, applications, and policies.

The study examines the need and role of energy storage in Switzerland for the years 2035 and 2050. It considers various types of storage -- electricity, heat, and gas/liquid storage -- and evaluates their ...
