

Constant Temperature and Humidity Type Communication Power Supply Cabinet for Microgrids

GL has designed climate controlled outdoor cabinets that house sophisticated electronic equipment, such as computers and servers consisting of microprocessors, fiber optic devices, Ethernet routers ...

Our climate controlled storage cabinets deliver stable temperature and humidity, so rubber, polymer, and composite materials age slower, inspections pass more often, and field crews stay ready.

The lineup consists of six models, with two size variations, 105 liters and 206 liters, and four temperature/humidity ranges, to accommodate your needs.

The SIMN XHH Series represents the pinnacle of precision environmental control technology, combining advanced temperature regulation with intelligent humidity management in a compact cabinet design.

The Huijue Photovoltaic Micro-station Energy Cabinet is a compact, intelligent energy solution for remote communications applications, microgrids, and off-grid applications.

With their highly efficient refrigeration system and outstanding thermal insulation, constant climate cabinets are ideal for use in laboratories and research facilities.

Experience the HJ-SG-D02 series from Huijue Group, a versatile outdoor communication energy cabinet designed for stable power supply in communication base stations, smart transportation, and more.

Available in both 100kWh and 215kWh capacities, this modular system integrates power modules, batteries, cooling, fire protection, and environment monitoring in a compact outdoor cabinet.

The six-model lineup includes 105- and 206-liter models available in four temperature (humidity) ranges and two sizes. All models support a single phase power...

The Base Station Energy Cabinet is a fully enclosed, weather-resistant telecom energy cabinet designed to provide reliable power distribution and battery backup for outdoor communication networks.
