

Container base station solar roof

We partner with Stealth Power to acquire and install the solar arrays on top of the container during the build. Stealth Power's stick-on panels make installation quick and easy. The roofs of our containers ...

With our Container Solar Mounting System, clean energy isn't limited to fixed locations. It goes where you go--powering your projects, reducing your carbon footprint, and keeping you self ...

Thinking of adding solar panels to your shipping container? Learn key considerations, how many panels fit on 20ft and 40ft containers, plus tips and real-world examples.

Discover how Higher Wire shipping container solar systems provide reliable, off-grid power for remote worksites and projects.

Solar support structure for adding solar panels to top of 40ft shipping container. Kit includes, rafter legs, support rails and Pro Solar module clamps.

Turn your container roof into a power station - without welding, cutting, or complicated installs! Our solar panel mounting kits are designed specifically for shipping containers.

e-DECKBOX is our fully integrated, CE-certified, ready-to-use mobile solar system, specially designed for 20- or 40-foot shipping container roofs, modular buildings, mobile cabins, pergolas, etc.

These mounting kits make it easier than ever to turn shipping containers into reliable solar power stations - whether for temporary sites, remote locations, or container-based infrastructure.

Discover the transformative potential of solar panels on shipping containers. Explore custom kits, modular configurations, and innovative applications.

In short, you can indeed run power to a container - either by extending a line from the grid or by turning the container itself into a mini power station using solar panels.
