

Energy storage lithium battery released in Wuhan

On December 5, Chuneng New Energy released the first "Immersion" battery system in the energy storage industry and conducted safety performance experiments on the system at the Jiangxia base ...

The Wuhan lithium-ion battery breakthrough came about after scientists developed new multilayer nanospheres using a hydrothermal method.

WUHAN, China, Sept. 19, 2025 /PRNewswire/ -- As a pioneer in big-batteries technology, EVE Energy has set a new industry milestone, building on its prior success in both launching and...

Now, after more than a year of development, EVE Energy has transformed bold innovation into practical reality and upgraded the cell capacity to 628Ah. Mr. Big was officially ...

In 2022, EVE Energy initiated the R& D of high-capacity cells with the 560Ah cell launched. The company has now achieved volume production of the 628Ah cells. The high-capacity ...

On November 4, EVE and Municipal People's Government of Jingmen City held a signing ceremony of strategic investment agreement for an annual output of 152.61GWh power and energy ...

Chinese battery maker EVE Energy Co., Ltd. ("EVE Energy") on Oct. 20 launched its new-generation energy storage battery LF560K, which is expected for global delivery in the second ...

On June 11th, the inauguration ceremony of EVE Energy Storage was held in Wuhan.

On the evening of October 20, EVE released a new generation of energy storage battery LF560K. The energy storage battery cell has a large capacity of 560Ah, a single battery can store ...

It is reported that the mass-produced products of Phase two plant are MB56, the new generation of energy storage batteries of EVE, which are applied in various scenarios such as ...
