

Ernst waldemar jungner battery

A Swedish engineer and inventor who was born on June 19, 1869, Ernst Waldemar Jungner's most regarded inventions were the nickel-iron electric storage battery (NiFe) and the nickel ...

Waldemar also experimented with a number of other metals that had better properties than lead. The objective was to create an accumulator that was sustainable and functioned even ...

Swedish scientist Ernst Waldemar Jungner produces the first alkaline battery in 1899. His design is the now-familiar nickel-cadmium electrode pair, in a potassium-hydroxide solution. This ...

In 1899 he invented the nickel-iron electric storage battery (NiFe), the nickel-cadmium battery (NiCd) and the rechargeable alkaline silver-cadmium battery (AgCd).

Jungner commercialized his NiCad battery invention, although he also investigated cement production, and extracting radium from ores. The nickel-cadmium battery he originally ...

Childhood and StudiesHis First InventionsJungner"S AccumulatorRescue Mission at The North PoleOn the rescue mission to save Umberto Nobile and his companions in the tragic 1928 expedition to the North Pole, several accumulators were thrown from an airplane in an effort to get the expedition's radio to function. Waldemar Jungner's nickel-iron accumulator was the only one that worked. Waldemar Jungner was elected into the Royal Swedish Academ...See more on tekniskamuseet.se.
