

Financing Lease of 2MWh Power Storage Cabinet for Mountainous Areas

Why should you lease a site for a battery energy storage system?

Land is the most important resource for the development of battery energy storage systems. Several factors must be considered when considering the leasing of a site for a BESS project, some of the most important being: The size of the land required for a BESS project depends on the capacity of the battery system.

Why are solar & battery storage lease rates increasing?

The increasing demand for landsuitable for solar and battery storage projects has driven up lease rates in recent years,especially because of the incentives offered by the IRA Renewable Energy. As the industry expands,competition for land is intensifying,particularly in regions with favorable solar and wind resources.
