

Florida microgrids freetown

Can communities apply for Microgrid assistance?

Yes. Communities are encouraged to apply to C-MAP for focused microgrid assistance that can complement support received from other federal programs, such as Communities LEAP (Local Energy Action Program), the Energy Technology Innovation Partnership Project, the Energy to Communities program, or the Office of Indian Energy.

Are Community Microgrids eligible for C-Map?

Community microgrids are often designed to operate primarily in grid-connected mode, with a point of connection to the bulk system. These systems may be eligible for C-MAP, but the microgrid is expected to operate independently or in island mode for long periods of time.

Can a community-scale microgrid provide backup power to Gerlach?

Washoe County - Nevada: Washoe County will assess the feasibility and economics of a community-scale multi-technology microgrid to provide backup power to the town of Gerlach, which is located at the outer reaches of the regional transmission lines and faces frequent winter power disruptions. (Amount: \$295,000)

How long does the community microgrid Innovation Exchange (c-mix) take?

Individual community projects are expected to be completed in 18 to 24 months. Once the project is concluded, communities will continue to partake in the knowledge sharing and resources offered by their peers in the Community Microgrid Innovation Exchange (C-MIX). What is the Community Microgrid Innovation Exchange (C-MIX)?
