

Grid-scale batteries are the direct solution. By charging up during quiet, off-peak hours, they can then release that power to support charging hubs during the day, smoothing out those ...

Ofgem is today (Tuesday 23 September) confirming the 77 projects entering the final assessment stage of a government-driven "super battery" support scheme designed to secure investment, promote ...

There will be a potential surge in battery energy storage system (BESS) projects receiving grid connection offers before 2030 following regulatory reforms approved by energy ...

Are you a landowner wondering, "how does grid battery storage work in the UK"? Whether you've already invested in wind or solar, or are just starting to think about renewable energy, I'm here ...

Operational capacity: ~5.5 GW / 6.5 GWh of battery energy storage is currently connected to the UK grid. Under construction: ~19 GWh of additional capacity is being built, with 17 ...

Find out about how to get yours connected to our network. What service do you need? What type would you like? Unsure where to start? Take a look at the application process for an energy storage ...

"Battery storage plays a vital role in Britain's clean energy transition. Connecting Thurrock Storage, the UK's biggest battery, to our transmission network marks a significant step on ...

This post investigates the state of the UK battery storage pipeline, year-to-date figures and an insight into the appetite to develop over time. Battery storage is essential for providing the ...

The pipeline of grid-scale BESS projects with planning approval in the UK has now reached 58,270MW/121,645MWh in capacity. That's according to the latest data from Solar Media ...
