The Clean Coalition established the Community Microgrid Initiative in 2010 to harness local solar and energy storage to deliver an unparalleled trifecta of economic, environmental, and resilience benefits ...

The Community Microgrid Assistance Partnership (C-MAP) provides funding and technical support for microgrid systems that enhance electricity reliability and security, particularly in remote areas of the ...

When Hurricane Ian hit Florida, Georgia, Virginia and the Carolinas in 2022, more than two million people lost power. But microgrids kept critical services running at hospitals, universities ...

Microgrids can operate in isolation from the larger grid when needed locally, and also provide energy to a region's main grid--and reduce carbon emissions and costs--during normal ...

Learn how GE Vernova's island and microgrid solutions have helped provide reliable power solutions in the Caribbean, Latin America, and more regions across the globe.

A BlockEnergy installation in Florida, approved as a pilot project by the Florida Public Service Commission, is an example of a community microgrid that already has proved its worth.

It's generally more difficult for private developers to build sophisticated microgrids in states like Florida that did not undergo industry restructuring. Utilities in these states have more monopoly sway.

Expanding community microgrids will require policy advocacy to facilitate their implementation at a larger scale. A handful of states and territories, including California, Hawaii, ...

Florida public power utility OUC is collaborating with Capacitech Energy in a microgrid project to demonstrate Capacitech Energy's largest deployment to date of the PowerLink, a cable ...

Solar-plus-battery microgrids (unlike generators) are not susceptible to the fossil supply chain issues that hit Florida this past hurricane season. Solar and battery costs continue to decline, ...
