What are EV batteries made of today? Electric vehicle battery technology reflects a combination of historical developments, innovations, and market demands.

Overview  
1920s-1950s: Dark age of electric vehicles  
Early history  
First full-scale electric cars  
1890s-1910s: Golden age  
1960s-1990s: Revival of interest  
2000s: Modern highway-capable electric cars  
2010s  
After enjoying success at the beginning of the 20th century, the electric car began to lose its position in the automobile market. A number of developments contributed to this situation. By the 1920s, an improved road infrastructure improved travel times, creating a need for vehicles with a greater range than that offered by electric cars. Worldwide discoveries of large petroleum reserves led to the wide availability of afford...
