

How to upgrade the Mini Base Station to Level 2

The USB port can be used to update the Base Station firmware when connected to a PC, but the primary way to update the firmware on the base stations is over their Bluetooth connection.

If there is an update for the Base Station 2.0 then it will update with a special Bluetooth module that is inside the Index headset similar to what the Knuckles uses for data.

You can connect the base stations to the USB port on your computer and update their firmware. If you see the icon, mouse over it to check if the firmware is out of date. If so, click Update Device. Unplug ...

While pressing the Channel button at the back of the base station, plug in the base station's power adapter. Once the base station is detected by the SteamVR app, the firmware update will start ...

USB (micro-USB) is there for updating the firmware, but firmware is normally updated using Bluetooth. The USB is useful only if you need to update firmware AND you have problems with ...

This Mini-Sentry cannot be upgraded, repaired, resupplied, or wrangled. It is slightly smaller than the Combat Mini-Sentry from the Gunslinger and fires at the rate of normal level 1 Sentry Gun.

Inside the game files, there are 3 upgrades to be found that are not currently in the game: a Sentry Gun radius upgrade, an upgrade that regenerates reserve ammo every 5 seconds, and an upgrade that ...

That's true, you can't do it. It's primarily because the hmd doesn't have the same Bluetooth chipset as the Index. It's the same reason you need a 3rd party app to control the sleep states. I guess, with ...

Add a third base station to cover a tricky spot in your room. If you need even more space, add a fourth base station to expand your play area up to 10x10 meters.
