

Iceland BESS sells new uninterruptible power supply price

An uninterruptible power supply, or UPS, is basically a surge protector, battery, and power inverter -- which turns the battery's stored energy into usable power -- in one.

In early 2024, the price of residential BESS offered to end consumers in Europe ranged widely, from EUR400 to more than EUR1,200 per kilowatt-hour (kWh) (Exhibit 2).

These regulatory steps, combined with greater BESS cost efficacy and the heightening demand for energy storage, is a promising sign for the further development of the BESS sector in Europe.

This article explores the unique uninterruptible power supply (UPS) strategies that keep Iceland's energy systems running 24/7, even in extreme conditions. Learn why this small nation is a global leader in ...
