

Ireland's rooftop solar energy storage

How much solar power does Ireland have?

Ireland surpassed 2.1 GW of installed solar capacity in November 2025, and the country's solar association, Solar Ireland, has revealed that 1 GW of this is from rooftop installations.

Why did Ireland reach 1 GW of rooftop solar?

The system was installed at the sports facility by local installer, SolarSmart and supported by local government. Commenting at the event, Ronan Power Solar Ireland CEO, said that Ireland reaching 1 GW of nationwide rooftop solar was a "national demonstration of what happens when policy certainty, public support and industry capability align."

Why is rooftop solar so popular in Ireland?

From homes and farms to sports clubs, SMEs and community buildings, rooftop solar has become one of Ireland's most successful and accessible climate solutions, supported by SEAI solar PV grants and strong public engagement. Rooftop installations have grown rapidly in recent years and now exceed 170,000 systems nationwide.

Does Ireland have a solar policy?

Expanding rooftop solar capacity at a local scale has been a big policy focus of the Irish government in recent times, with grants for small-scale and residential solar issued through the Sustainable Energy Authority Ireland (SEAI).

Ireland surpassed 2.1 GW of installed solar capacity in November 2025, and the country's solar association, Solar Ireland, has revealed that 1 GW of this is from rooftop installations.

Ireland has marked another major milestone in its clean-energy transition, with 1 GW of rooftop solar now installed across the country. From homes and farms to sports clubs, SMEs and ...

The country now has more than 100,000 rooftop solar projects, adding more than 400MW of clean energy to the national grid, according to new figures from ESB Networks, Ireland's ...

As Ireland's renewable energy landscape evolves, energy storage solutions have become the missing link in maximizing the potential of solar power systems. Modern battery technology now ...

Over 100,000 rooftop solar microgenerators have now been connected to Ireland's electricity network, according to ESB Networks, cumulatively adding over 400MW of clean energy ...

Contrary to popular belief, Ireland is well suited to solar power generation. Advances in technology and falling costs have made both domestic and large-scale solar installations ...

Under the auspices of the Irish Solar Energy Association (ISEA), SolarSmart and several other leading Irish solar firms have come together to form a "Solar Rooftop Standards" working ...

The potential of small-scale solar in Ireland 4.1 Rewards and challenges of rooftop solar 4.2 Costs 4.3 Quantitative modelling of solar PV uptake by Irish households 4.3.1 Solar PV and ...

We explore how rooftop solar systems will help Ireland hit the 80% renewable electricity target by 2030 to secure a greener, more sustainable future for us all.

Dublin, 13 November 2025 - Ireland celebrated a landmark moment in its clean energy transition, with national solar capacity surpassing 2 GW for the first time. This milestone reflects the remarkable ...
