

Is the investment in solar panels large

Are solar panels a good investment?

Due to technological advancements, increased competition, and healthy incentives, solar owners can save hundreds of thousands in energy costs over the life of their system. Today, installing solar panels is considered a long-term investment with strong rates of return-- much like buying a house.

How much does a solar panel cost?

Upfront solar panel costs: Homeowners in Kentucky, Kansas, Alaska and the Dakotas benefit from the country's lowest upfront solar panel costs -- all ranging between \$13,100 and \$13,600. Consumers encounter the highest costs in Hawaii (\$19,600), Wisconsin (\$17,600), New Hampshire (\$17,500), Minnesota (\$17,300) and Idaho (\$17,100).

Do solar panels have a positive ROI?

A positive ROI means that over the lifetime of your solar panels -- usually between 25 and 35 years -- the amount of money you save on energy bills or earn through your solar panels will be greater than the initial investment cost. It usually takes about 10 years to cross that threshold with the federal solar tax credit and about 13 years without it.

Are solar panels cost effective?

In previous decades, solar panels weren't nearly as cost effective to install as they are today. Due to technological advancements, increased competition, and healthy incentives, solar owners can save hundreds of thousands in energy costs over the life of their system.
