

Liyang Solar Power Station

The Liyang Pumped Storage Power Station is a 1,500 MW pumped-storage hydroelectric facility located in Tianmuhu Town, Liyang City, Changzhou, Jiangsu Province, eastern China, featuring six ...

As the "Dual Carbon (Carbon Peaking and Carbon Neutrality)" goals drive energy transformation, a green energy monument standing tall in the Jiangnan water town--the 100MW/200MWh energy ...

Some pull over at the roadside charging station powered by the solar array. This eco-friendly scene, especially fitting on April 22, the 56th Earth Day, is part of a broader zero-carbon ...

When energy demand is high, water is released back down to the power station to produce electricity. The power station will contain six 250 MW reversible Francis pump-turbines which serve to both ...

CATL announced today that its Liyang plant in east China's Jiangsu Province has been recognized as one of the 21 new members of the Global Lighthouse Network (GLN) by the World ...

Liyang Bieqiao Solar PV Park is a 30MW solar PV power project. It is located in Jiangsu, China.

Founded in 1995, Linyang Energy is a national high-tech enterprise listed on the Shanghai Stock Exchange. As a main force in green energy transformation, Linyang adheres to a zero-carbon ...

After nearly a year of construction, the 20-megawatt photovoltaic power plant invested by Liyang Chunhui PV Co., Ltd. with an amount of 160 million yuan is available of grid-connected operation.

Photo shows a charging station powered by the solar array at an industrial park in Liyang, a county-level city under Changzhou in east China's Jiangsu Province on April 17, 2025.

Liyang Solar PV Park is a ground-mounted solar project. The project generates 23,100MWh electricity thereby offsetting 24,000t of carbon dioxide emissions (CO2) a year.
