

# National policy on energy storage system

What are energy storage policies?

These policies are mostly concentrated around battery storage system, which is considered to be the fastest growing energy storage technology due to its efficiency, flexibility and rapidly decreasing cost. ESS policies are primarily found in regions with highly developed economies, that have advanced knowledge and expertise in the sector.

Will China develop new energy storage systems between 2025 and 2027?

BEIJING, Sept. 12 -- China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure the stability of new-type power systems.

What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

How many energy storage policies did China release in 2024?

China released 770 energy storage-related policies in 2024, with 77 issued at the national level. The policies primarily focus on development plans, new energy storage integration, electricity market regulation and subsidy programs.

The China New Energy Storage Development Report 2025 represents a major milestone in the institutionalization of NES planning and governance in China. By quantifying progress and ...

On February 27, the National Energy Administration released the "2025 Energy Work Guidance" to outline the year's energy work roadmap and boost the new energy storage industry. ...

Collectively, these concerns led to a change of policy in February 2025, when the mandate was retired. A September 2025 national action plan, however, has set the 2027 target for new energy ...

Abstract: Major countries in the world have policies to support the large-scale development of energy storage to promote increase in renewable energy use, improve and optimize existing power systems, ...

China's energy storage sector is heavily influenced by government policies aimed at promoting renewable energy and reducing carbon emissions. The National Development and Reform ...

These policies are mostly concentrated around battery storage system, which is considered to be the fastest growing energy storage technology due to its efficiency, flexibility and ...

China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure ...

# National policy on energy storage system
