

Northern Solar Power Generation Order

The Northern Crescent Solar and Storage project by Primergy Solar in Faribault County would be able to generate up to 150 megawatts of grid interconnected solar power and store up to 50...

A breakdown of each GSP in the NPg region, with stacked columns for each generation type. If you wish to remove a type from the graph you can click it on the legend at the bottom of the ...

Recently, this ambitious project received unanimous approval from the Minnesota Public Utilities Commission (PUC), clearing a significant regulatory hurdle and paving the way for ...

This Resolution approves a Power Purchase Agreement (PPA) between Pacific Gas and Electric Company and Northern Orchard Solar PV, LLC for Zero Emissions Product from Hybrid Resource ...

Description Joint Application for two site permits, a site permit for the Northern Crescent Solar Facility and a site permit for the Northern Crescent Battery Energy Storage System.

Whether you're looking to install charging points for EVs, solar panels or heat pumps as part of a commercial project, we're here to help. Our expert guidance ensures a smooth and efficient process, ...

Generation, Solar & Energy Storage Guidance on connecting small and large-scale generation and energy storage to our network.

We want to make the journey for connecting your generation equipment as easy as we can. You can use this page to access application forms for connecting generation to our network. Report a power ...

The approval marks a significant milestone for the project, which includes up to 150 MW of grid-interconnected solar generation and 50 MW of grid-charged battery energy storage capacity in ...

Find everything you need to know about connecting large scale generation and electricity storage devices that meet specific criteria. We're committed to making the process of connecting your ...
