

Outdoor AP base station settings

Are outdoor APs allowed to transmit at higher power?

In many regions, outdoor APs are allowed to transmit at higher power, but only if they follow specific rules (like using fixed antennas). Outdoor Mode adjusts the transmit power to legal outdoor limits, based on your country code and AP model. 3. Antenna gain is recalibrated UniFi APs assume a certain gain based on their design.

What is Outdoor Mode on UniFi access points?

Outdoor Mode on UniFi access points is designed for exactly what it sounds like, outdoor use. It adjusts power, disables DFS channels, and optimizes signal behavior for open-air environments. When used correctly, it boosts long-distance performance and ensures compliance with wireless regulations.

What is an indoor AP?

Indoor APs are, usually, equipped with omnidirectional antennas (which allow broadcasting the signal in a "donut" shape around the AP), which have a relatively low antenna gain. For indoor and short distance outdoor installations, it is a perfect antenna to use.

Should I Turn on outdoor mode on my AP?

If your AP is weather-sealed and installed outdoors, enable Outdoor Mode. That's exactly what it's designed for. Even if the AP is technically indoors (like in a warehouse or near a window), if you're aiming coverage toward a yard, parking lot, or open field, it makes sense to turn it on.
