Overview Electricity supply and demand Overviews Access to electricity Service quality Responsibilities in the electricity sector Renewable energy resources History of the electricity sector Electricity in Haiti is 110 volts, alternating at 60 cycles per second. Most of the generation infrastructure in Haiti is very old and costly to maintain and operate. In 2006, total installed capacity was only 270 MW, of which about 70% was thermal and 30% hydroelectric. There are currently three large thermal plants and one hydroelectric plant serving the metropolitan area and some smaller thermal and hydroelectric plants in the provinces. The most important plants are:

The Haitian electricity sector has a national installed capacity that is largely insufficient to meet a demand of 157 MW in Port-au-Prince and of 550 MW at the national level.

On June 17, residents of Mirebalais forced the closure of the Pligre power plant for the second time, demanding that the government strengthen security to end the terror and gang ...
