

Our automated Solar/PV modules production line includes a complete set of equipment, such as solar cells laser cutting, string soldering, welding, glass loading, layup, laminating, framing, J-Box ...

Grenzebach provides hot end as well as cold end technology. We are your partner along the entire production line, from the annealing Lehr to the cold end with cutting, stacking and conveyor equipment.

As a manufacturer of flat glass equipment for the hot end, HORN supplies the melting technology and the cast glass rolling machines with the associated automation of the system. The ...

Explore Casso-Solar's Glass Lamination Lines with autoclave and non-autoclave options, featuring infrared and convection heating for diverse glass applications.

The delivery of the process equipment, its installation, supervision and commissioning will be executed by Horn. As a manufacturer of flat glass equipment for the hot end, Horn supplies the ...

Whether you're a solar panel producer or a construction materials supplier, understanding the equipment for producing photovoltaic glass directly impacts product quality and market competitiveness.

Achieve optimum glass conditioning with our fuel-efficient systems: forehearth, working ends, feeder mechanisms and stirrers. With a focus on green solutions, our systems optimize heat transfer ...

Our portfolio includes not only automatic solar panel production lines, but also individual equipment for PV modules production, from glass loading equipment at the beginning to solar panel assembly and ...

In addition to melting technology, Horn Glass provides a complete range of equipment for glass furnaces and the forming and annealing of float glass. One of the latest developments is the company's ...

Solar glass hot end equipment
