What is a solar PV inverter?

A solar PV inverter is a power inverter that converts electricity in direct current (DC) output from a photovoltaic (PV) solar panel into alternating current (AC) at utility frequency. This can be used for residential and commercial electrical grids or by a local off-grid electrical network, such as microgrids.

How big is the solar PV inverter market in 2024?

By application, utility-scale installations accounted for 63% of the solar PV inverter market size in 2024, while residential is set to grow at a 7.6% CAGR through 2030.
