

# Solar power generation project subcontracting

Why should a solar energy project developer partner with sunrock distributed generation?

The EPC shoulders the risk of on-time, on-budget delivery while ensuring the facility meets performance guarantees. Partnering with a solar energy project developer like Sunrock Distributed Generation provides crucial development and financing support to help EPCs focus on execution and reduce unnecessary surprises.

Do solar projects need an EPC contract?

In our experience, most utility-scale solar projects use an EPC Contract. An operation and maintenance agreement: This is usually a medium- to long-term Operating and Maintenance Agreement (O&M Agreement) with an Operator. The term of the O&M Agreement will vary from project to project.

What is the future of solar EPC project management?

The future of Solar EPC project management is set to be shaped by rapid advancements in technology and an increasing focus on sustainability. One major trend is the integration of digital tools and automation into every phase of project management.

Why should you partner with a solar energy project developer?

Partnering with a solar energy project developer like Sunrock Distributed Generation provides crucial development and financing support to help EPCs focus on execution and reduce unnecessary surprises. To successfully deliver bankable solar projects, EPCs must proactively address risks during both negotiation and execution.
