

The utility-scale data covers all operating solar farm phases with capacities of 1 megawatt (MW) or more and all announced, pre-construction, construction, and shelved projects with capacities greater than ...

To access additional data, including an interactive map of global solar farms, a downloadable dataset, and summary data, please visit the Global Solar Power Tracker on the Global ...

The U.S. is still on track to build a record amount of new solar capacity this year, even as the Trump administration works to obstruct renewables.

In the third quarter of 2025, about 20% of planned US solar power capacity experienced delays--down from 25% a year earlier, signaling improving project timelines, according to the US ...

Explore the detailed solar farm construction process, covering site assessments, regulatory needs, and crucial stakeholder engagement. ??

From California to New England, construction of solar energy is picking up speed, showing promise for hitting sustainability goals. In this article, we cover the largest solar energy ...

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

Concentrating solar power (CSP) projects that are under construction are listed below alphabetically by project name.

Notes: Reactor status data collected between 4 a.m. and 8 a.m. each day. All times are based on eastern time. Additional plant status information is made available on the web page after ...

In the third quarter of 2025, solar projects representing about 20% of planned capacity reported a delay, a decrease from 25% in the same period in 2024, based on data compiled from ...

Solar power plant construction status
