

# State Grid Microgrid Office

Microgrid policies vary significantly by state. The MRC is focused primarily on those jurisdictions with the most aggressive clean energy policies and resilience mandates.

The State Grid Corporation of China (SGCC), commonly known as the State Grid, is a Chinese state-owned electric utility corporation. It is the largest utility company in the world. As of March 2024, State Grid is the world's third largest company overall by revenue, behind Walmart and Amazon, and is also the largest government-owned company by revenue. In 2023 it was reported as having 1.3 million employees, 1.1 bi...

One of these solutions is microgrids that can disconnect from the grid and offer grid resilience during an outage. While this technology is still finding its footing in the industry, states ...

In terms of microgrid design, this means that the microgrid does not have to be built to serve power 24/7, but instead can be built to provide power during times the main electric grid experiences an outage ...

This report will explain how microgrids operate, the ways in which they can support the reliability and resilience of the power grid and the policies state legislatures have adopted to support ...

Although State Energy Offices and PUCs have different electric distribution system roles, each is interested in ensuring the safe, reliable, affordable, and beneficial deployment of resilience projects, ...

Has the state incorporated microgrid planning into other policy processes, such as prioritizing microgrids as a resilience or distribution modernization solution, integrating them into resource planning, or ...

It incorporates new policy activity from utility commissions, legislatures, and state agencies across the country, highlighting policy successes while calling attention to the continued ...

The State Grid Corporation of China (SGCC), commonly known as the State Grid, is a Chinese state-owned electric utility corporation. It is the largest utility company in the world.

The Microgrids Working Group is hosting facilitated discussions between State Energy Offices and PUCs to explore microgrid technologies and applications, policy and regulatory frameworks, and ...

The State Microgrid Policy, Programmatic and Regulatory Framework will help public utility commissions and State Energy Offices with microgrid policy and regulation development.
