

The UK's solar power market

This research report categorizes the market for the UK solar power market based on various segments and regions and forecasts revenue growth and analyzes trends in each submarket.

The UK solar energy market was valued at US\$ 3.9 Billion in 2024 and is expected to register a CAGR of 6.1% over the forecast period and reach US\$ 6.7 Billion in 2033.

The UK has surpassed 2GWp of newly installed solar capacity in 2025, marking its strongest start in nearly ten years, with an additional 3GWp of large-scale ground-mounted projects ...

Our study treats the United Kingdom solar power market as the total on-grid and off-grid photovoltaic capacity physically installed within UK borders, spanning crystalline-silicon, thin-film, ...

Solar energy adoption across the United Kingdom has accelerated significantly, with installations spanning residential, commercial, and utility-scale applications. The market demonstrates robust ...

Clean Power 2030 has definitely shaken up the market, with some developers seeing a huge opportunity, whilst others take a big hit, having to drop some projects completely in order to put ...

IMARC's industry report offers a comprehensive quantitative analysis of various market segments, historical and current market trends, market forecasts, and dynamics of the UK solar power market ...

The UK distributed solar power generation industry comprises solar panel manufacturers, system integrators, energy storage providers, and service companies offering installation and ...

The United Kingdom market dynamics and trends are being enhanced by its goals to achieve a fully decarbonised power system and a fivefold increase in solar generation by 2035. Consequently, ...

The UK solar market is forecast to grow by 50% year on year (YoY) for the second year in a row, expected to add 5-5.5GWp-dc of capacity in 2026, comfortably the best year on record.

The UK s solar power market
