

The first person to connect solar energy to the grid

Decades after Becquerel's initial findings, an American inventor named Charles Fritts took the theoretical knowledge of the photovoltaic effect a step further. In 1883, he created what is ...

In the modern world, solar energy stands as a beacon of sustainability and innovation. However, few people know about the humble beginnings of this revolutionary technology. The ...

Solar power was first discovered by French physicist Edmond Becquerel in 1839 at the young age of 19. At the time, Becquerel was experimenting in his father's lab when he observed the photovoltaic ...

Shuman built the world's first solar thermal power station in Maadi, Egypt (1912-1913). Shuman's plant used semicircle shaped troughs to power a 60-70 horsepower engine that pumped ...

Solar power was first discovered by French physicist Edmond Becquerel in 1839, while he was experimenting in his father's lab. Becquerel observed the photovoltaic effect, a process that ...

Wilhelm Hallwachs (German) discovered that a combination of copper and cuprous oxide was sensitive to light. Albert Einstein published a paper on the photoelectric effect. He would win 1921 Nobel Prize ...

The Institute of Energy Conversion is established at the University of Delaware to perform research and development on thin-film photovoltaic (PV) and solar thermal systems, becoming the world's first ...

In 1973, researchers at the University of Delaware built the first house to integrate solar photovoltaic cells. The building, named "Solar One," used heat and electricity converted from ...

Discover the pioneers of solar power who shaped the industry, including Becquerel, Einstein, and Telkes. Learn about their contributions to solar energy and the impact they had on the ...

In 1972 I wrongly thought that I had produced an original idea -- a worldwide grid to allow total greening of electricity production! Although I read a lot about technology, until about three years ...

The first person to connect solar energy to the grid
