

Transnistria grid stabilization

On 11 December, Transnistria's legislature, the Supreme Council, approved a state of economic emergency for a period of 30 days as ordered by the President of Transnistria, Vadim Krasnoselsky, ...

In Transnistria around 250,000 people are entirely without heat or hot water and are relying on an increasingly fragile electrical grid. Today we're going to look at how this crisis is ...

After struggling without heat for six days, a breakaway region in the Eastern European country of Moldova is now short of electricity, too, with the authorities ordering eight hours of power ...

The energy crisis in Transnistria has reached its peak. Rejection of alternative solutions and dependence on Russian gas have led to a critical situation in the region.

The halt of gas supplies resulted in a heating outage in Transnistria. While the rest of Moldova has switched to European energy supplies, the region, occupied by Russia since the early ...

The future of Transnistria, wedged between Moldova, Russia, and Ukraine, is far from clear, but the energy crisis may prove a tipping point in the long-standing dispute over the region's future.

Long reliant on heavily subsidized Russian gas and access to EU markets, Transnistria's fragile economic model was thrown into disarray in January 2025 when Moscow, facing logistical ...

In the capital of Transnistria, a self-declared microstate sandwiched between Moldova and Ukraine, the festive New Year's lights have gone dark ahead of schedule. This separatist sliver of...

Authorities in Moldova's separatist Transnistria region said on Saturday that energy conservation measures have allowed them to ease restrictions caused by a halt to Russian gas ...

A technical failure at the Moldovan Thermoelectric Plant (MGRES) triggered a partial blackout across the Transnistrian region on Friday, February 6. Local sources reported that power ...
