

## Victron pace bms

I Have a feeling that I might have to download the &quot;bms software&quot; of the battery to change the settings to Victron. The only reason I think this is that the Manual from the battery has a one line sentence ...

This Pace BMS ticks all the boxes. Easy setup with Victron and works with Jakiper in parallel.

If you know the real capacity of your cells, your BMS will tell the correct SOC to the Victron, and the Victron will then stop discharging at the correct place.

VE.Bus BMS / VE.Bus BMS V2 SmallBMS NG SmallBMS with pre-alarm Smart BMS 12-200 Smart BMS CL 12-100 Where to buy Need advice? Our highly trained dealers are happy to help with questions, ...

I've got it configured as a lead acid battery on my inverter currently but would really like the BMS to communicate properly. Can anyone offer any help for setting the protocol on the battery? ...

Does anyone knows If I can connect my server rack battery (pace bms, it has a victron protocol option) CAN to the victron mppt ve.can directly? All I could...

I will confirm later when sun is up. Also, ccl, dcl etc. is being controlled by bms (shows up under parameters). Furthermore, I see movement of Tx and Rx so packets are sent/received. ...

Your battery must have a relay that can open and close based on BMS trigger events - preferably TWO for charge/discharge separately. You must connect this relay (s) as described in the ...

Both BMS are very similar and work great with Victron and most inverters. The Pace BMS can also natively be paralleled with Jakiper batteries (which use the Pace BMS as well).
