

What is the use of san diego solar cabinet system

Does San Diego have solar panels?

The intense California sun is a boon to those with solar panels, as that bright sunshine spells more affordable power. San Diego currently has more solar rooftops than any other city in California, and with an average of 266 days of sunshine per year, that translates into a great deal of power collected by those panels.

Why is San Diego a hotbed of solar power?

Here are some reasons why San Diego is a hotbed of solar power. San Diego is home to some of the highest electricity rates in the nation. Add in the cost of heating a pool, "fueling" an electric vehicle and running air conditioning to battle the southern California heat, and homeowners are looking at jaw-dropping monthly bills.

Does San Diego have a rooftop solar system?

Those savings have spurred tremendous growth in rooftop solar installations in San Diego. New residential systems decreased by 36 percent between 2016 and 2017, according to the Center for Sustainable Energy. However, with new legislation requiring new homes to include solar, those numbers will likely increase.

Does solar still make sense in San Diego County?

Regardless of location in San Diego County, solar still makes sense for homeowners who are paying around \$150 or more per month on electricity. Solar policies in San Diego are changing rapidly, especially with the 2016 switch to net metering 2.0. Even as long-standing incentives phase-out, more are waiting to take their place.
