Inverters waste energy converting DC power to AC, and there are plenty of other losses in power generation and distribution, so why not simply supply low-voltage DC power to homes to begin ...

If you're on the grid or need to power AC devices from a DC source, an AC inverter is the way to go. But for renewable energy setups, DC inverters are a better fit.

AC power works well at high voltages, and can be "stepped up" in voltage by a transformer more easily than direct current can. An inverter increases the DC voltage, and then ...
