

Wind blade generator explosion incident

What happened at the site of a wind turbine accident?

First responders tried to revive the technician but he was later declared dead at the scene. Photos taken at the site of the accident show two turbine blades resting on metal scaffold. Another blade is lying on the ground next to pieces of scaffolding that were tipped on their side. Workers were also seen gathered in a nearby paddock.

How far out did a GE turbine blade break?

The blade broke about 20 meters (65.62 ft) out from the root, Vineyard Wind said. In May, a single blade on the same model of GE turbine at the Dogger Bank A offshore wind farm also sustained damage, leading its operator SSE Renewables to restrict access to the waters around the project and investigate the cause.

What happens if a turbine blade fails?

They can cause minimal issues, like a reduction in performance, or catastrophic failure, like the Vineyard Wind incident. Experts contacted by The Light said they were not aware of a global or regional database that tracks how many turbine blades have failed.

Can GE Vernova's Haliade-X turbine blade break?

How GE Vernova's Haliade-X turbine blade -- among the largest composite structures in the world -- is manufactured, and what can cause it to break. On Saturday, July 13, a newly installed turbine at the Vineyard Wind farm started undergoing routine testing before it could send power to the grid.

The Light examines the troubled GE wind turbine blade, how blades are manufactured, and what can cause them to break.

By using drone technology and artificial intelligence, high-resolution images of wind turbine blades are obtained and analyzed, enabling early detection of cracks and/or erosions. ...

A Siemens Gamesa wind turbine blade weighing 22 metric tons fell off the machinery on Wednesday but no one was hurt, the Odal Vind wind farm in Norway said, a month after it halted ...

A man has died in a horror accident after being crushed by a wind turbine blade. The 36-year-old installation technician had been working at a construction site in Rokewood, in Australia's ...

Did GE Vernova break a wind turbine blade? Link Copied! Giant wind turbine blades for the Vineyard Winds project are stacked on racks in New Bedford, Massachusetts. The massive ...

BSEE's suspension order directs Vineyard Wind to cease power production from all its wind turbine generators until it can be determined whether the blade failure affects any other turbines ...

Another wind turbine blade at the Swedish Björnsäter park has broken in an incident last Sunday, occurring exactly two months another blade broke at the Swedish wind farm, in operation ...

Wind blade generator explosion incident

"A single turbine at the Vineyard Wind offshore wind farm has experienced an isolated event. No injuries occurred, and we are coordinating with our customer to investigate the event," said ...

Beaches were closed in the tony beachfront town of Nantucket, Massachusetts when an offshore windmill blade exploded into pieces, many of which washed ashore, endangering ...

Vineyard Wind, the nation's first large-scale offshore wind farm, was shut down by the federal government on Tuesday after a turbine blade failure sent thousands of pieces of debris into ...
