

Wind-to-grid power generation scam

His comments on Tuesday contained false and misleading information about the use of wind power in the United States and around the world, and came on the heels of an executive order he signed ...

Off-grid generators are essential for those seeking energy independence, whether for remote cabins, emergency preparedness, or sustainable living. However, the rise in demand has ...

For more than a decade, the United States has been guided by a story about energy that presents wind power as one of the few responsible paths forward. The idea has been repeated so ...

Like 19th century fears that telephones would spread diseases, wind farm conspiracy theories reflect deeper anxieties about change. They combine distrust of government, nostalgia for the...

The article, "Trump Speaks Truth to Wind Power," underscores critical points about the inefficiencies, costs, and unintended consequences of federal subsidies for renewable ...

In fact, many argue that the whole wind turbine game is nothing more than a costly scam. Let's dive into the numbers, the politics, and the realities behind this industry to understand why wind ...

President Donald Trump claims that rapid adoption of solar and wind power has made U.S. electricity unstable and expensive, justifying his bid to end most subsidies for renewable energy.

There, Republican Sen. Chuck Grassley actually backs wind power and has moved to protect it. Democrats have also criticized the Trump administration's moves against renewable energy.

They are not viable for baseload power--even with \$5 trillion in subsidies and two decades of trying. Today, using wind and solar for mass power generation is an artificial political solution that would not ...

The British government has been conned into placing a massive bet on offshore wind and is forcing electricity consumers to spend billions of pounds on a dead-end technology. The falling ...
